

**Education**  
Building schools for the future

## TMC working with the Education Sector

**The technological advancement of today's modern schools is accelerating.**

TMC has been consulting with various construction partners involved in the build of PFI schools that will showcase the latest developments in audio, visual and lighting in media rooms, music recording spaces, assisted learning rooms and theatres.

Projects using audio, visual and lighting in more specialist education such as multi sensory rooms and hydrotherapy pools have proven how TMC's specialist skills and our partners technology can be highly effective in developing areas.

Lecture Theatres/Auditorium

## Multisensory/Hydrotherapy

Used to develop a sense of comfort and control, multisensory environments promote a range of senses within the education environment for pupils with communication and learning difficulties.

Stimulation of sight, hearing and touch with the use of sound and lighting, promotes and encourages reactions such as hand/eye coordination, cause and effect, relaxation and communication.

## Training

TMC believe that the only way forward is by learning. TMC provide training for both industry professionals and local education authorities.

### Drama/Dance Studios

The nursery of all budding performers, drama studios and school productions provide valuable experience for students studying music and the performing arts.

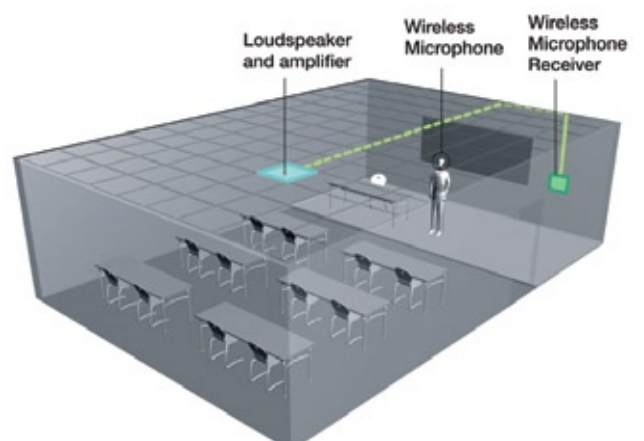

With expert experience from TMC, drama and music studios across the country have benefited from new sound and lighting systems.

Soundfields

### Recording Studios/Music Recital

The introduction of recording studios in schools is a modern advancement and a reflection of the growth of the creative and performing arts industry. TMC's considerable experience and specialist knowledge provides valuable skills for recent developments within PFI schools. Our consultation has provided new build schools with highly qualified knowledge during planning and the highest degree of quality control through installation.

Established in 1987, TMC Ltd has been successfully delivering audio, lighting and visual solutions for more than 20 years. As the leading specialist in this industry, our clients benefit from more than 50 years of experience and assurance from leading brands.

Working with our partners, guarantees that we offer the very latest technology advances to match a variety of environments and events, supported by our fully qualified technicians.
